

# VCL UNDERBODY SCRAPER

ISO 9001:2000 REGISTERED

The Heavy Duty Underbody Scraper turns your snow plow truck into a multi-purpose performer. Snow removal and ice blading can be done at the same time. The Viking Underbody Scraper uses standard grader blades as well as carbide ice cutting edges. Light grading can be done easily and efficiently. The addition of a Viking underbody scraper is like having another grader at a fraction of the cost.

Model	Moldboard Length	Moldboard height	Weight
UB1020	10'	20"	2,830 lbs
UB1120	11'	20"	2,910 lbs
