Moldboard lengths

### Heavy Duty Power Reverse Trip Edge Design Features:

- 39" tall 3/8" thick polymer moldboard for weight reduction and minimize snow build up
- 3 1/2" x 16" SA reversing cylinders with push frame mounted cushion valve protection
- (3) 5/8" x 8" sectional cutting edges allowing independent tripping action to clear all obstructions and adjust to any road surface condition
- (6) torsion trip springs cushion the tripping action of the cutting edges, therefore, reducing damage to vehicle and equipment
- (10) 3/8" thick vertical moldboard ribs
- 4" x 4" x 3/8" heavy duty tubular push frame assembly
- (4) 1 3/8" thick moldboard to push frame attachment lugs
- Integral design curb shoes

## Options

- Steel Moldboard
- Rubber Flap
- Plow Markers
